NEW MEXICO DENTISTS RECEIVE NEW PROGRAMS

National Electronic Attachment, Inc. (NEA) announced today for the first time, all dental providers submitting electronic claims in an entire state has received a copy of electronic attachment software. New Mexico already boasts the highest number of dental providers per capita transmitting both electronic claims and electronic attachments in America. Now every dental office and every oral surgery clinic in the state of New Mexico has received an electronic attachment program that will allow those providers to send attachments to electronic claim payors and to send from provider to provider. The only requirement to receive the program was that the office had to be an electronic claim transmitter.

Several groups played an active part in the delivery of these systems to the dental offices: Aetna, CIGNA, MetLife, and Blue Cross and Blue Shield of New Mexico.

“NEA was pleased to be the vendor for this important program. The sophistication of the communications software along with its simplicity to use will help in the building of RHIOs (Regional Health Information Organizations) across the country”. Stated Tom Hughes, CEO of National Electronic Attachment. “Of course, it always helps to have 135 outstanding Payors as part of our network.”

NEA is the leader in internet-based solutions for the healthcare industry, offering systems designed to make the process of insurance submissions and processing as easy as possible for the Patient, the Healthcare Provider and the Insurance Payor.
