National Electronic Attachment Partners with MacPractice to Offer an Integrated Electronic Attachment Solution

Atlanta, GA – February 11, 2009– National Electronic Attachment, Inc. (NEA) and MacPractice of Lincoln, NE announced today they have entered into a partnership to provide MacPractice clients the ability to seamlessly submit attachments electronically. Through this agreement MacPractice will fully interface with NEA's *FastAttach*™ system enabling them to offer an integrated electronic attachment solution to their clients.

FastAttach™ enables dental offices to transmit attachments (x-rays, perio charts, lab reports, physician's notes, intra-oral pictures, narratives, EOB's, etc.), via the Internet, where payors are able to view them, in support of electronic claims. *FastAttach*™ accelerates claim processing and eliminates the need to duplicate or mail attachments.

"NEA is proud to announce that MacPractice, Inc. has signed an agreement to use the *FastAttach*™ system for the transmission of electronic attachments," said David Fincher, VP of Sales at NEA. "This is exciting news for the MacIntosh users that previously could not use NEA's service. We look forward to a great business relationship with MacPractice."

"We are always looking for ways to increase productivity and reduce costs for our clients, and NEA's *FastAttach*™ is a proven value added service that we look forward to implementing with our client base" says Mark Hollis, President and co-founder of MacPractice.

About MacPractice

MacPractice, Inc. is a client-centric practice management and clinical software development firm, comprised of highly experienced and caring individuals, dedicated to the development and support of best-of-class Macintosh software, hardware and associated services for physicians, dentists, and chiropractors.

About National Electronic Attachment, Inc.

NEA, *The Recognized Leader in Electronic Attachments* and Internet-based solutions for the healthcare industry, offers systems designed to make insurance submissions and processing as easy as possible for the patient, the provider and the payor.
