

## What is *FastKapture*?

Whether you need to send dental records or radiology images to a dental plan or payer, NEA has an easy way to facilitate secure file capture and transmission via your tablet or mobile device. *FastKapture* is a compliant, patented mobile device application for use with *FastAttach*®.

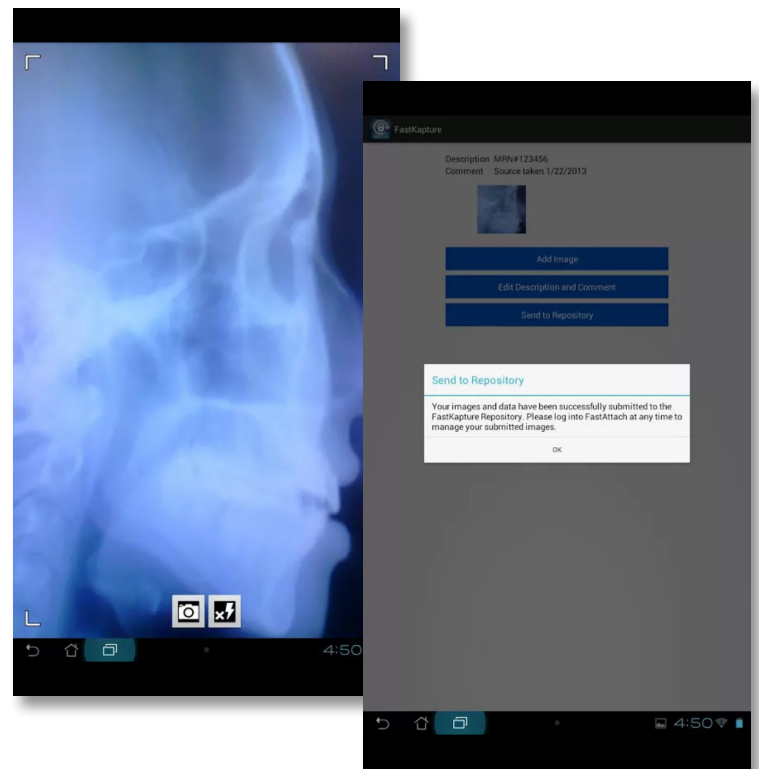

*FastKapture* simplifies the task of dental image capture and transmission with a safe, easy-to-use smartphone application. This free mobile app allows you to use the camera on your portable device to securely capture and upload indexed dental images and documents directly to *FastAttach*.

## Seamless Integration with *FastAttach*

*FastKapture* works seamlessly with *FastAttach* to offer another convenient method for securely capturing and transmitting documentation. Even if your office hasn't gone digital yet, you can still use *FastAttach* by simply downloading *FastKapture* for your image capture. Best of all, images captured using *FastKapture* are not stored on your mobile device, eliminating the risk of compromised protected health information.

## *FastKapture* Allows You To:

- Capture, index and transmit documents and images from your mobile device
- Provide secure document and image capture and transmission
- Eliminate the need for a scanner
- Improve your revenue cycle
- Access images online 24/7 through your existing *FastAttach* account

*FastKapture* is a free download that works with most Apple and Android devices including smartphones, ipads and tablets.

Download *FastKapture* in the App Store on your Android® or Apple® mobile device.

## Experienced Customer Support

If you have any questions about *FastAttach* or *FastKapture*, NEA's experienced support team is ready to help. We provide prompt, courteous service including best practice guidance on how to simplify document capture and image review.
