Know What Attachments are Required with FastLook™

What is FastLook?

FastLook - exclusively available from NEA - is a convenient online tool that enables FastAttach® users to search by payer/dental plan then by procedure code so that providers know what claims require attachments before starting the initial claim submission process. Imagine being able to electronically access a payer's attachment requirements prior to submission and how much time that could save your practice. Using FastLook improves chances for first-time claim adjudication because you know what to send BEFORE you submit the claim.

FastLook is available 24/7 and has all the up-to-date information needed to determine which clinical codes require supporting images or documentation (e.g. x-rays, full mouth series, EOB). Using FastLook reduces unnecessary claim attachment submissions and eliminates the need to verify individual payer

attachment requirements on their websites. All of the information you need is at your fingertips whenever you need it.

How to access FastLook

FastLook can be accessed via the FastAttach software's "Online Features" or via the new FastAttach Web online command center. Additionally, several of our approved Channel Partners have integrated the FastLook attachment requirement verification process into their interface with FastAttach. The integrated verification process allows providers to further streamline the attachment submission process by identifying claims that require attachments and requiring providers to create/submit attachments for the indicated claims.

Regardless of whether you use FastLook directly in FastAttach or via an interface partner, submitting the required attachments with your claims has never been easier! Try FastAttach and FastLook today!
