Vyne Connect delivers affordable, encrypted email exchange

Vyne Connect delivers a user-friendly solution for email encryption.

How can you safeguard the Protected Health Information (PHI) of your patients, yet communicate with them in a manner that's convenient for everyone involved? Email is a quick way to send info to patients, payers and other providers, but depending on what's being sent, it could cause a compliance nightmare if you're not using an encrypted email service. *Why risk thousands of dollars when there's a simple solution?*

**Take the fear out of knowing what can and can't be sent via standard email with Vyne Connect.**

Vyne Connect encrypted email makes sending PHI or any other information necessary to parties outside of your organization a snap — and it helps keep you in line with increasingly complex security regulations like HIPAA. Vyne Connect uses trusted encryption standard for its messaging platform. A minimum of two encryption protocols are used for every delivery of a Vyne Connect message or attachment - 128-bit HTTP over SSL and 256-bit AES.

- Send anything from treatment plans to billing information

- Take control of your communications with flexible options for message auditing, notifications, expiration, and message recall

Affordable, robust, encrypted email at your fingertips.

We've taken the guesswork out of searching for the best email encryption program for your money. Vyne has done the research and uses our connections to negotiate an unheard-of price for this robust, yet easy-to-use service.

- Vyne Connect gives you access for five (5) email accounts to send encrypted messages to anyone for only $19.95 per month.

- The average industry cost for comparable service is approximately $46 per month.

You can also bundle this tool as part of the standard $39 FastAttach subscription. For one low monthly fee, you get not only FastAttach, but also the Vyne Connect email encryption service. One vendor, one great deal!

Vyne Connect is easy to use, with little disruption to your existing processes. The service requires minimal training, a setup process that takes just minutes, and allows you to use your existing email address. For message recipients, Vyne Connect keeps things simple and does not require recipients to register for a special account. They can easily view, download, and reply to emails sent with Vyne Connect securely and at no added cost to them.

What can you do with Vyne Connect Email Encryption?

Encrypt and send documents from most major email applications.

Exceed compliance regulations such as HIPAA, HITECH, SOX, GLBA, CJIS, FIPS, and more.

Reduce cost, risk of data loss, and avoid compliance issues.

Simple setup, minimal training, and unlimited support from NEA.

Take control with message auditing, notifications, expiration, and message recall.

Send encrypted records from your dental practice to anyone including other providers, patients, or payers.

Intelligent message controls set Vyne Connect apart

Vyne Connect enables you to take control of your communications using your existing email accounts. It provides flexible options for administering your email that a standard email service cannot offer. These intelligent message controls include the ability to:

• Define how you want recipients to verify their identity to access an email message (ex. enter date of birth, account number, or other custom information)

• Obtain a real-time proof of delivery log that gives you control over protected messages showing who, when, and where each message was opened

• Setup instant notifications that tell you when an email was viewed by the recipient

• Set expiration dates/times so that you only make a message available for a specified window of time

• Recall a message that may have been sent to an incorrect email address

• Revoke access privileges at any time - even after the email has been viewed

Compatible with the systems you already use

Vyne Connect's seamless workflow enables users to send encrypted messages from Outlook 2007-2016, a webmail portal, smartphone, tablet, or any computer. It is fully supported on most major mainstream web browsers (IE, Firefox, Chrome, Safari, etc.) using most widely used Operating Systems (Windows7+, OSX 10.4+ and current Linux variants). Vyne Connect also integrates with Outlook (via the Outlook Add-in) for Outlook 2003, 2007, 2012, and Office 365.

Supported by a team you trust

NEA clients expect a certain level of support and that's what you'll get with Vyne Connect.
